Safety Data Sheets

To obtain GHS compliant Safety Data Sheets for chemical products of Desco Industries, Inc. (DII), go to the product's web page and click "Technical Information". The Technical Bulletin can be viewed, printed, saved or emailed.

According to Occupational Safety and Health Administration (OHSA) 29 CFR 1910.1200(c), non-hazardous and non-chemical articles are exempt and no longer require Material Safety Data Sheets.

Per Occupational Safety and Health Administration (OHSA) 29 CFR 1910.1200(c), an "article" is defined as...

...a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (in) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees.

DII non-chemical products meet this definition; therefore, under 29 CFR 1910.1200(b)(6)(v), DII non-chemical products are exempted and a Safety Data Sheet (or Material Safety Data Sheet) is not required. This statement is being offered in lieu of an MSDS / SDS for OSHA recordkeeping and EPA Right-To-Know compliance.

We plan to provide only the required Safety Data Sheets and advise end users to follow their Hazardous Communication recordkeeping policy for discontinued Material Data Safety Sheets.

The product information is to the best of our knowledge and may be based on third party supplier information and/or our knowledge and experience regarding ESD control and other products.

See Desco Industries Inc. limited warranty at <http://descoindustries.com/Warranty.aspx> which states in part: Desco Industries Inc. only obligation shall be to replace such quantity of the product proved to be defective. Desco Industries Inc. shall not be liable for any injury, loss, or damage, direct or consequential, arising out of the use of or the inability to use the product. Before using, users shall determine the suitability of the product for their intended use, and users assume all risk and liability whatsoever in connection therewith.
